

New Financial Support for the Carrefour Québécois de la Fabrication Additive

Montréal, May 3, 2022 – PRIMA Québec is proud to announce that the *Carrefour québécois de la fabrication additive* (CQFA) is set to receive financial support from a new collaborator, the [METALTec industrial R&D group](#), led by the [National Research Council of Canada \(NRC\)](#). This \$66,000 contribution over three years will help structure the *Carrefour* in its early stages. It will help mobilize researchers, industrialists, entrepreneurs, funding organizations and other stakeholders from the additive manufacturing ecosystem in an effort to promote the technology's adoption, along with training and skills development.

The support from METALTec, whose objective is to find innovative solutions to the challenges of the metal products manufacturing industry through collaborative R&D projects, comes in addition to the financial participation of the *Ministère de l'Économie et de l'Innovation du Québec* (MEI) and Canada Economic Development for Quebec Regions (CED) under the *Programme d'appui au développement des secteurs stratégiques et des créneaux d'excellence*, a program designed to develop Québec's strategic sectors and fields of excellence.

The CQFA was launched in 2021 in response to key recommendations from the [Livre blanc sur la fabrication additive au Québec](#), the whitepaper on additive manufacturing in Quebec. The CQFA will develop, implement and host a service hub focused on the needs of Quebec manufacturers. Beyond raising awareness for this disruptive technology, "The *Carrefour* will promote Québec's various sectors of expertise," said Marie-Pierre Ippersiel, President and CEO of PRIMA Québec. "It will facilitate the sharing of knowledge, experience and resources while creating business opportunities that promote the growth of Québec's AM ecosystem."

About PRIMA Québec

PRIMA Québec is an advanced materials research and innovation hub that supports and promotes the advanced materials ecosystem and acts as an engine of innovation and growth in Quebec. Through support and funding, it stimulates the competitiveness of Quebec companies by facilitating access to research expertise. Acting as a Sectoral Industrial Research Group (SIRG), PRIMA Québec relies on financial support from the Quebec government as well as the private sector when promoting research-industry relations.
